

# BRAIN IMAGING IN AUTISM

## RESEARCH STUDY

We are looking for children with ASD to participate in NIH-funded brain imaging (MRI, MEG) and behavioral research studies, and receive a comprehensive neuropsychological evaluation at no cost!

### Your child might be eligible if she or he:

- ✓ Is 7 - 21 years old
- ✓ Has a diagnosis of (or is suspected to have) Autism, Asperger's, or Autism Spectrum Disorders
- ✓ Has no metal in body (e.g., dental braces, retainers)

All participants will be paid for their time.
